# THE HOME YOU WANT. THE HOUSE YOU NEED.

## Things to consider to safely stay in your home

Zero step entrances

Hand held shower head

Wider doors and hallways

Install roll-in showers for safety

Evening out floor heights  
that are different

Thresholds that are lower, so you  
don't have to step or roll over to  
enter or exit

Non-slip flooring  
in bathrooms

Install proper lighting

installing handrails and  
grab bars

Install heating and air  
conditioning systems that  
are easy to read and control

Clean and safe storage

Kitchen counter tops and cabinets  
that are at the right height with  
reachable storage

## Assessment and fact sheet for **home shows**

**1**

How long would you like to stay in your current home?

---

---

---

**2**

What's keeping you from staying?

---

---

---

**3**

Three changes that would make it more feasible to stay in your home?

---

---

---
